

# CUAHSI Water Data Services Workshop

Come learn about CUAHSI's Water Data Services. These services are free, open-access, and available to everyone. Learn how these services can help you and your team:

- Develop data management plans, which are now required by most funders.
- Discover and find a broad array of water data-time series, samples, spatial coverages, and more.
- Use CUAHSI apps and tools for expediting and documenting workflows.
- Share your data within a group and publish your data with a DOI.

Funding opportunities for graduate students also will be discussed.

**Where:** McKimmon Center, Room 4

**When:** Friday, March 22 from 2:20 p.m. - 4:00 p.m.

**What:** Bring a laptop and any data you are interested in archiving.

Please email us in advance at [help@cuahsi.org](mailto:help@cuahsi.org) if you would like us to use your data as an example or have specific questions you want addressed.
