

Provides:

6 Contact Hours/PGHs

For Water and

6 Contact House/PGHs
for Wastewater

2019

Dates/Locations:

September 10
Robeson County
Emergency Operations Center
38 Legend Rd
Lumberton, NC 28358

September 11
Goldsboro Event Center
1501 S. Slocumb St Goldsboro,
NC 27530

**Lunch will be
provided at both
locations.**

***This class is offered at
no charge for
attendees,
compliments of EPA
funding through
NCRWA.***

**SPACE IS
LIMITED!**

FLOOD RESILIENCE:

Training for Water and Wastewater Utilities

Training designed for the water and wastewater sector in North Carolina. This one-day training will provide guidance and information for drinking water and wastewater utilities to enhance their ability to withstand a flooding event, minimize damage, and rapidly recover from disruptions to service.

TRAINING OBJECTIVES

- Learn how to use the U.S. EPA “Flood Resilience: A Basic Guide for Water and Wastewater Utilities” (Flood Resilience Guide)
- Complete an example flood assessment using the Guide and enable you to repeat the assessment at your utility
- Learn how to identify mitigation measures to effectively protect your utility from flooding
- Learn about funding options for implementation of mitigation measures
- Network and learn from each other

TRAINING FORMAT

This training will include working sessions on each of the four primary sections of the “Flood Resilience Guide”, provide real-world examples of flood mitigation efforts, provide information about funding options for mitigation measures that utilities may want to implement, and will include presentations on North Carolina’s floodplain management resources. Participating organizations may include area water and wastewater utilities; stormwater utilities; technical service providers; water sector associations; and consultants. A scenario used during the training examines the impact of flooding on a hypothetical utility and is used to allow participants to conduct an example flood assessment.
